SETON HALL UNIVERSITY - WALSH LIBRARY

PROJECT SUMMARY

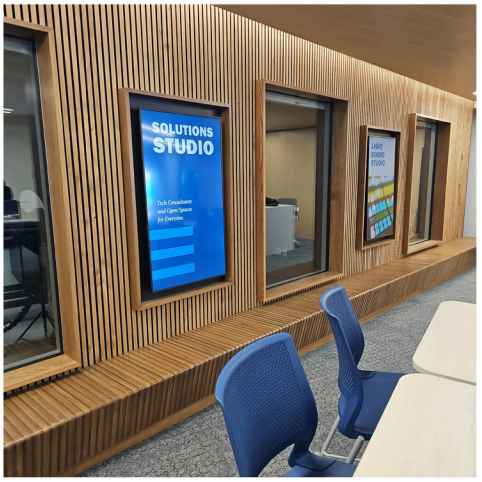
CTCI is delivering a comprehensive audiovisual transformation of Seton Hall University's Walsh Library, converting it into a full-scale media production and collaboration hub.

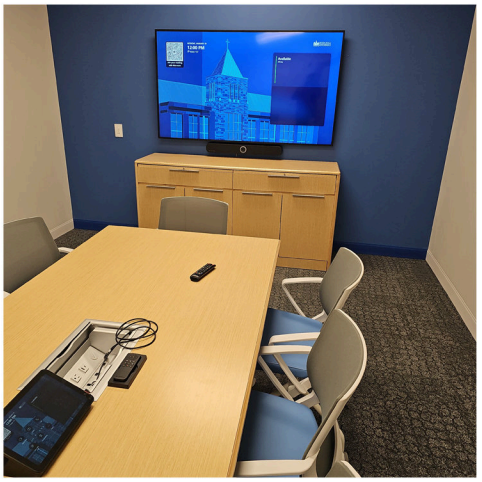
The project spans broadcast-grade recording studios, podcast and lightboard studios, a One-Button Studio, conference and consult rooms, and large-format presentation spaces — bringing professional production capability directly to students and faculty.

Address: 400 South Orange Avenue, South Orange, NJ 07079

PROJECT OVERVIEW

A total of 10+ spaces are being upgraded within Walsh Library. The centerpiece is a broadcast-grade Recording Production Studio and Control Room featuring a VizRT TriCaster production switcher, Sony cinema-line PTZ and full-frame cameras, Yamaha Dante audio infrastructure, and Clear-Com wireless intercom — giving students hands-on experience with industry-standard broadcast tools.

Adjacent spaces include a Podcast Studio with Huddly AI-tracking cameras and a Telos Axia broadcast mixing console, a Lightboard Studio built around a 55" transparent OLED display, and a One-Button Studio for simplified self-serve video production.




Additional upgrades include Crestron- and Q-Sys-based conference and consult rooms, a Makerspace, a Genius Bar, and a large Whitebox Presentation Space featuring a 10K laser projector and multiple 86" displays, all tied together with standardized AV-over-IP distribution and control.
